

Python

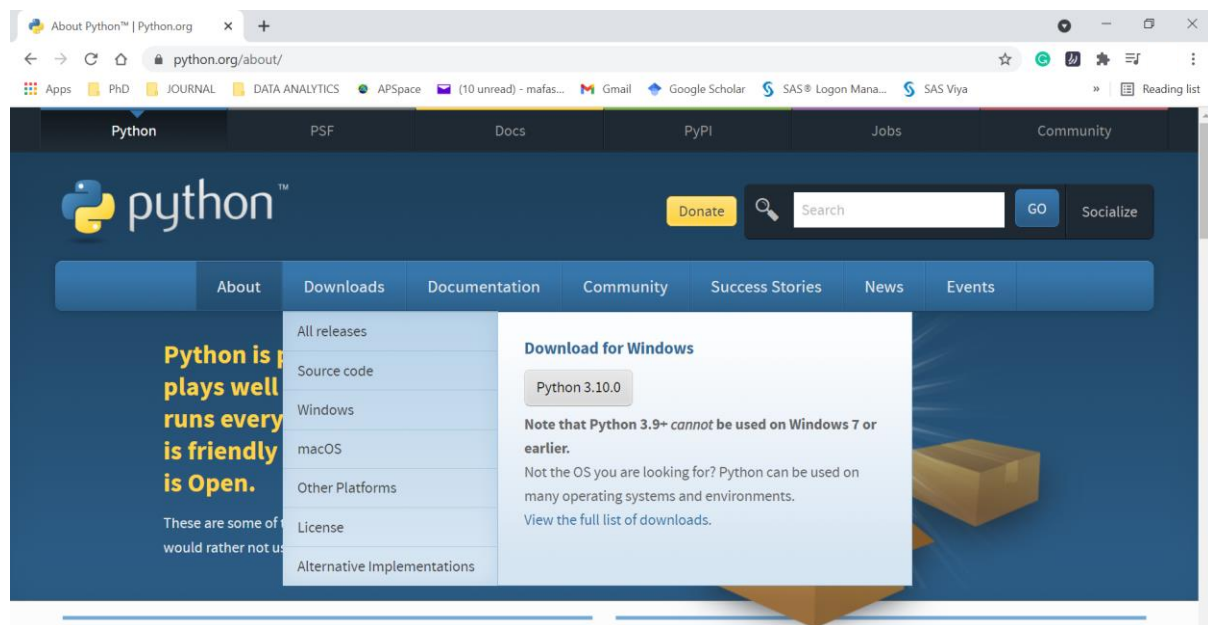

Python is a programming language that lets you work more quickly and integrate your systems more effectively.

Installation Guide – Option 01

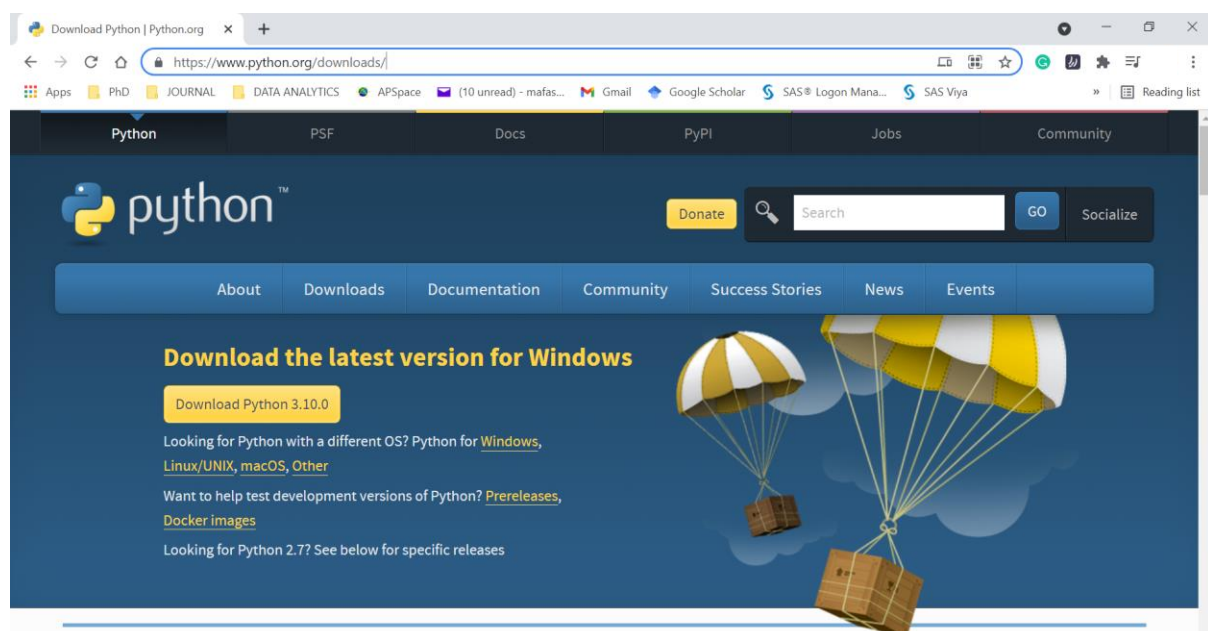

Download and Install Python via

<https://www.python.org/downloads/>

Select the right version of Python according to the operating system of your laptop/desktop.

After the installation of Python language into your laptop/desktop, you can use IDLE to write and execute python programs.

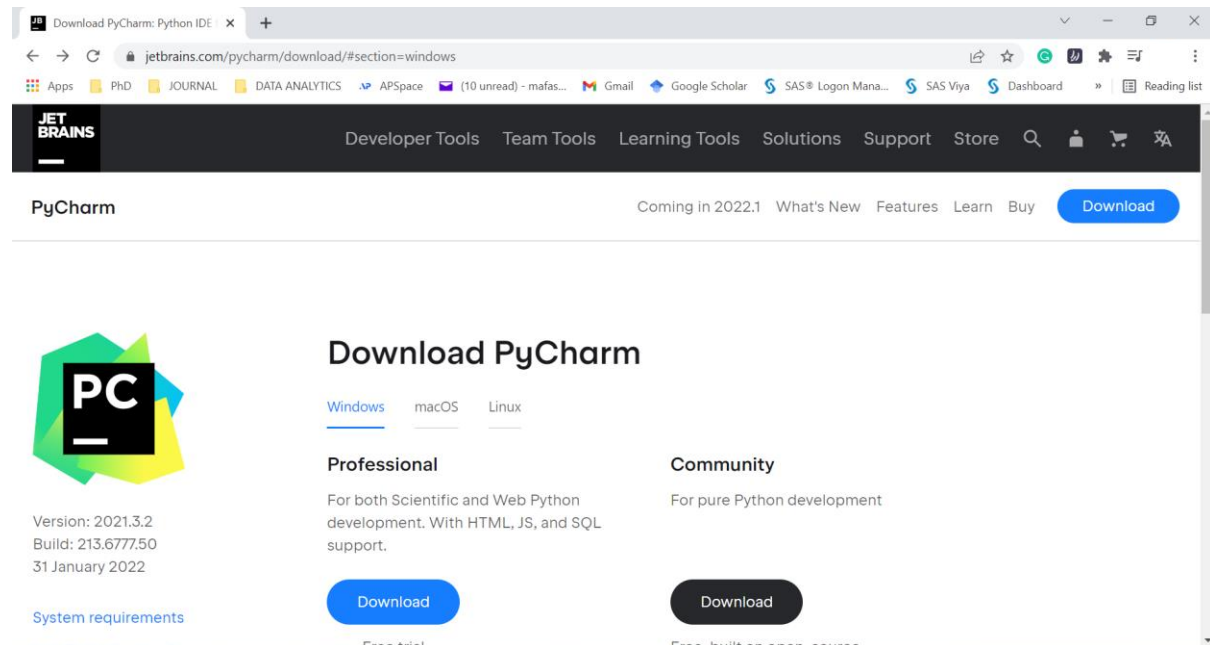

IDLE is an integrated development environment for Python, which has been bundled with the default implementation of the language.

Also, you can use either PyCharm or Visual Code as IDEs for your Python programming requirements.

Installation Guide – Option 02

Download and Install PyCharm via

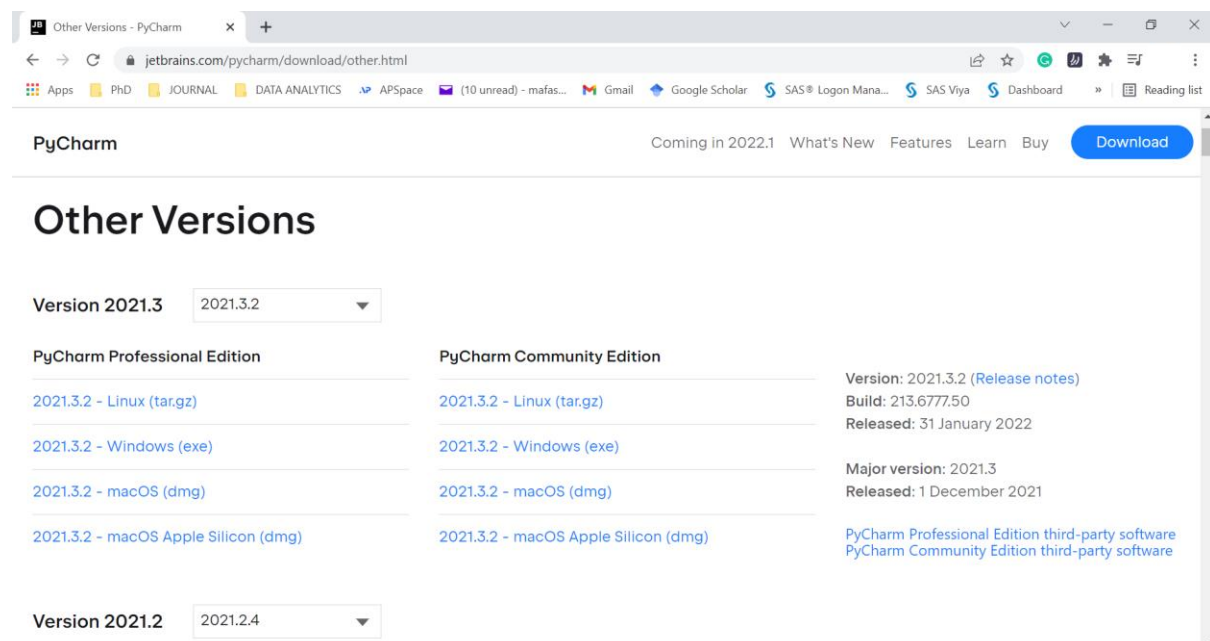

<https://www.jetbrains.com/pycharm/download/#section=windows>

The screenshot shows the JetBrains PyCharm download page. The browser address bar displays `jetbrains.com/pycharm/download/#section=windows`. The page features the PyCharm logo on the left, which includes the text "PC" inside a stylized hexagon. Below the logo, it states: "Version: 2021.3.2", "Build: 213.6777.50", and "31 January 2022". To the right of the logo, there are tabs for "Windows", "macOS", and "Linux", with "Windows" selected. Below these tabs, there are two main sections: "Professional" and "Community". The "Professional" section describes it as "For both Scientific and Web Python development. With HTML, JS, and SQL support." and includes a "Download" button. The "Community" section describes it as "For pure Python development" and also includes a "Download" button. At the top right of the page, there is a navigation bar with links: "Developer Tools", "Team Tools", "Learning Tools", "Solutions", "Support", "Store", and a "Download" button.

You may get specific version according to the operating system you use via

<https://www.jetbrains.com/pycharm/download/other.html>

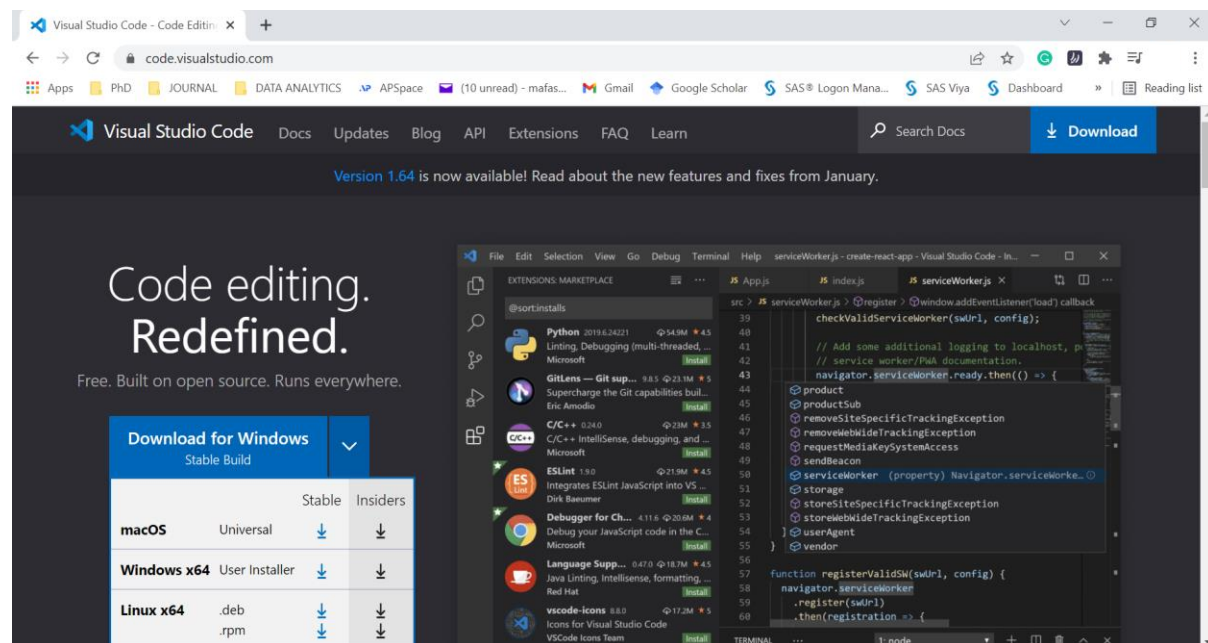

The screenshot shows the JetBrains PyCharm "Other Versions" page. The browser address bar displays `jetbrains.com/pycharm/download/other.html`. The page features the PyCharm logo at the top left. Below the logo, there is a "Version 2021.3" dropdown menu set to "2021.3.2". The page is divided into two main columns: "PyCharm Professional Edition" and "PyCharm Community Edition". Each column lists download links for different operating systems: "2021.3.2 - Linux (tar.gz)", "2021.3.2 - Windows (exe)", "2021.3.2 - macOS (dmg)", and "2021.3.2 - macOS Apple Silicon (dmg)". To the right of these columns, there is a section with additional information: "Version: 2021.3.2 (Release notes)", "Build: 213.6777.50", "Released: 31 January 2022", "Major version: 2021.3", and "Released: 1 December 2021". At the bottom, there is a "Version 2021.2" dropdown menu set to "2021.2.4".

Installation Guide – Option 03

Download and Install Visual Code via

<https://code.visualstudio.com/>

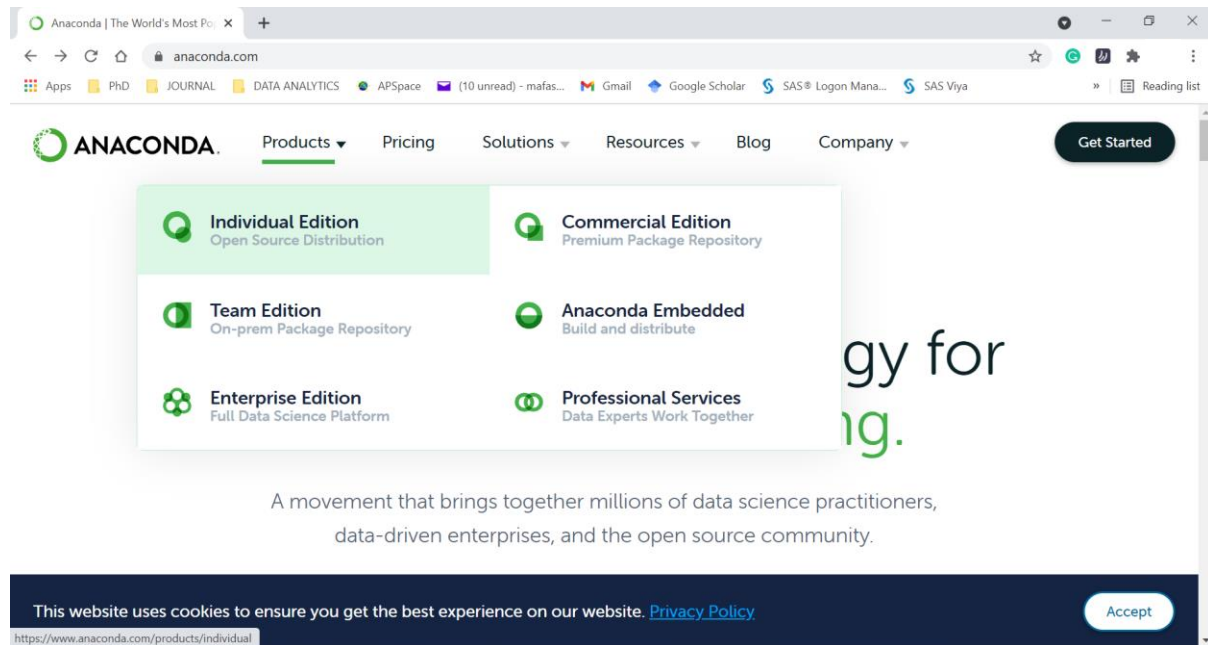

Select the specific one according to the operating system

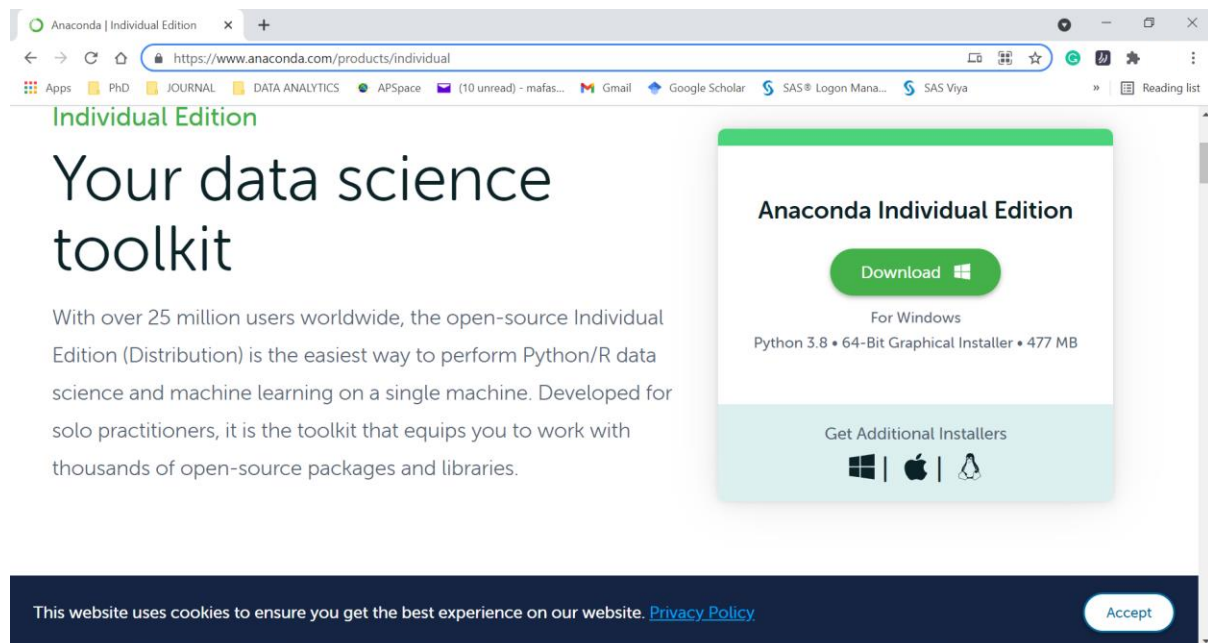

Installation Guide – Option 04

Download and Install Anaconda via

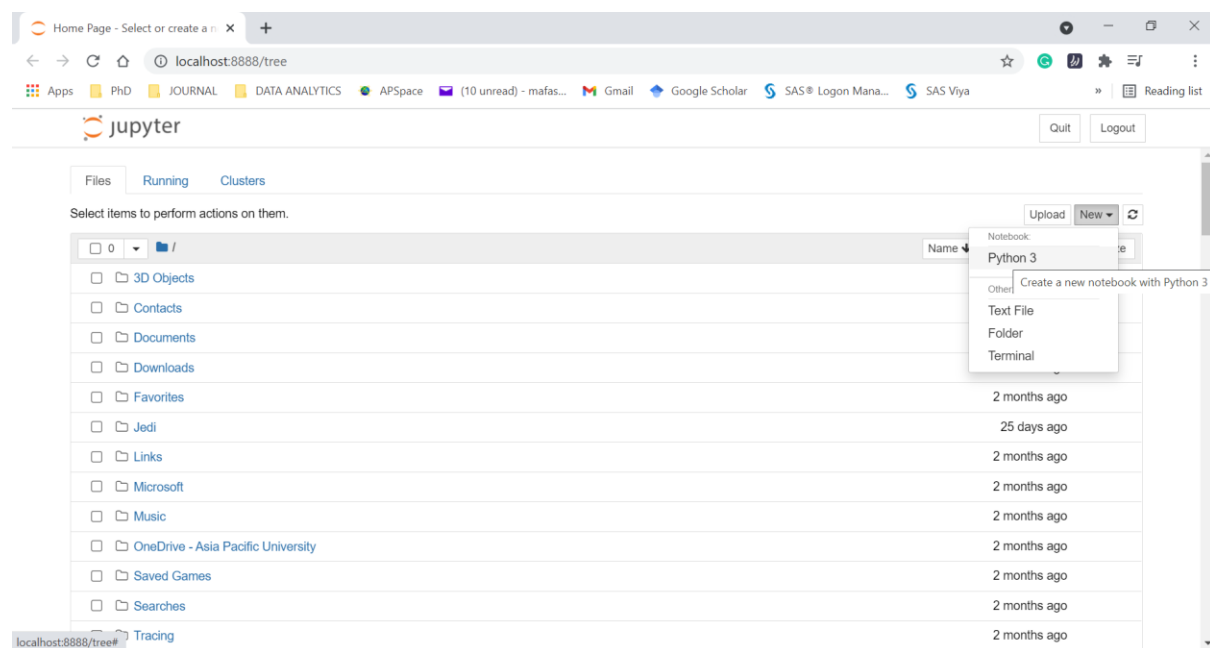

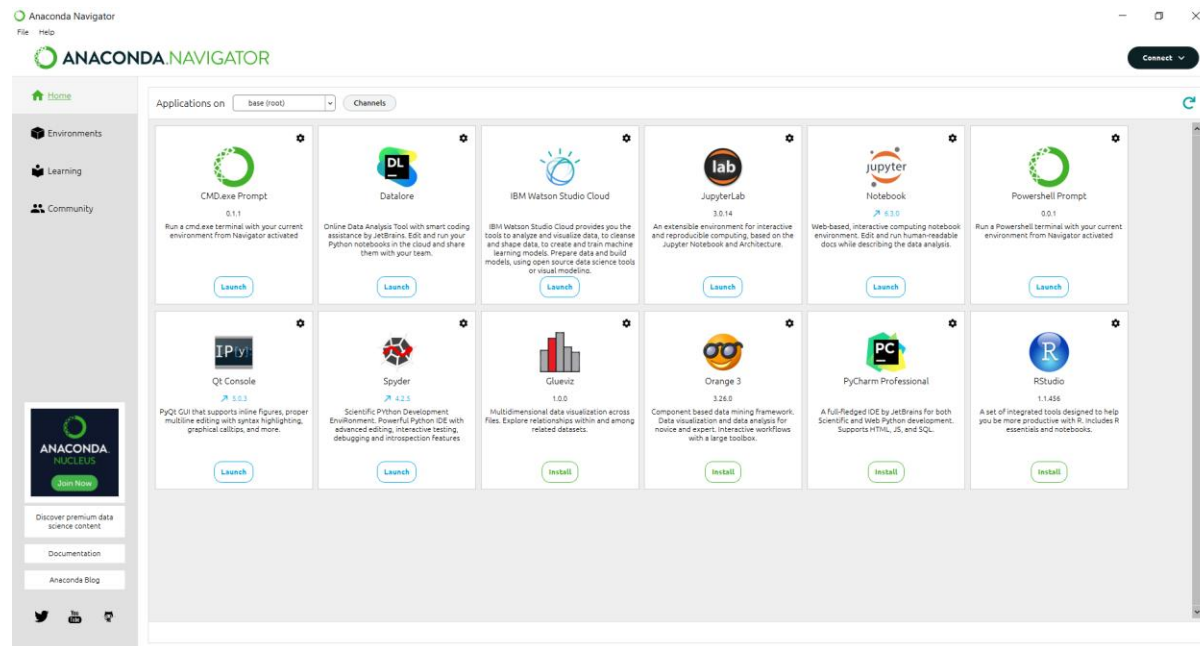

<https://www.anaconda.com/>

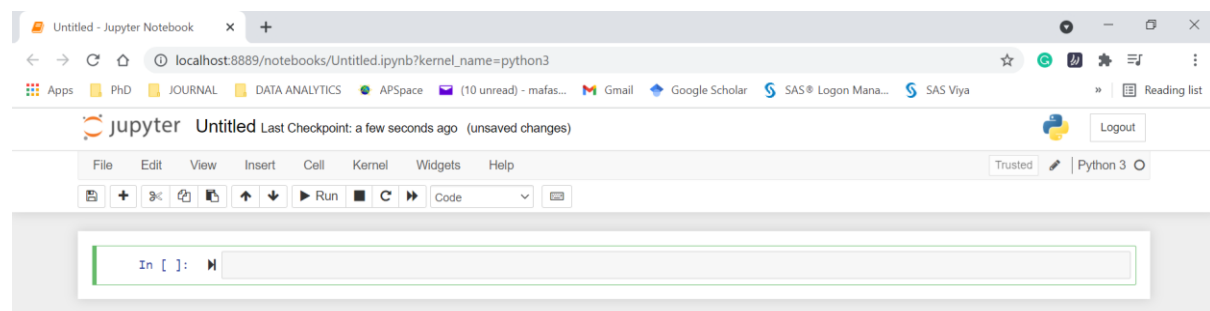

<https://www.anaconda.com/products/individual>

After the installation, you will get an Anaconda Navigator and can load the **Jupyter Lab** or **Jupyter Notebook** to work with python programming. These are IDEs.

Can use the new notebook to write and execute the python program

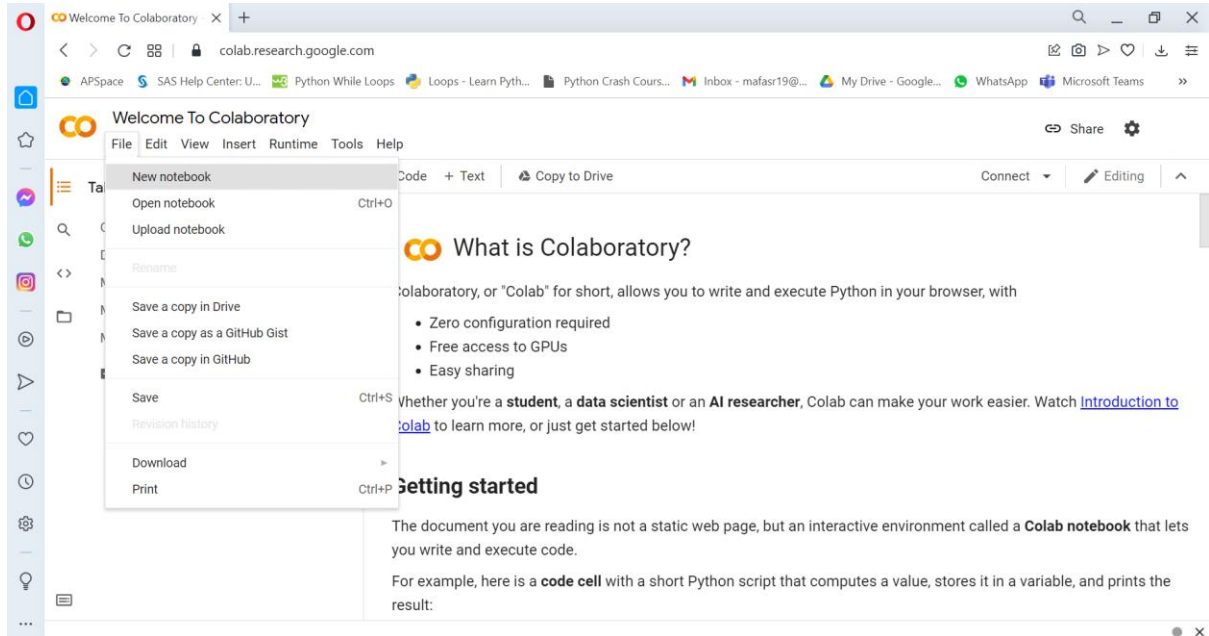

Colab Guide – Option 05

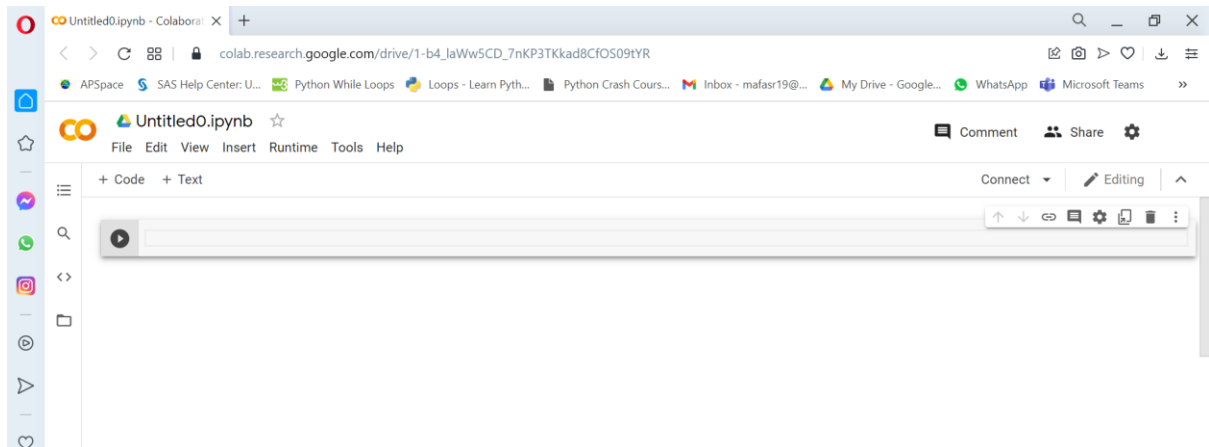

Use **Colab** via <https://colab.research.google.com>

You need to have a Gmail account to use this facility. Colab is an IDE maintained by Google.

Can use the new notebook to write and execute the python program

Dr Nirase Fathima Abubacker (*PhD, MPhil, MCA, BSc*)

Associate Professor (Computer Science - Data Science/Data Analytics)

Educator, Consultant, Trainer, Mentor

Asia Pacific University of Technology and Innovation (APU), Kuala Lumpur, Malaysia
